All dimensions are approximate and subject to normal construction variances and tolerances. Plan and dimensions may contain variations from floor to floor. There are two generally accepted methods for calculating the square footage of the Unit. The "Parametrical Method" is based on the description of the boundaries of the Unit, as set forth in the Declaration of Condominium and only includes the airspace within a Unit. The "Architectural Method" measures a Unit to the outside finished surface of exterior walls and to the centerline of interior demising walls and includes portions of the Common Elements of the Condominium. The square footage derived using the Architectural Method is set forth above and is included in sales materials to allow a prospective buyer to compare the square footage of the Units with units in other condominium projects that utilize the Architectural Method. The Parametrical Method is used in the legal documents for Palazzo del Sol / della Luna at Fisher Island, A Condominium (Phase II) at Fisher Island, A Condominium. All artists' or architectural renderings, sketches, graphic materials and photos depicted or otherwise described herein are proposed and conceptual only, and are based upon preliminary development plans, which are subject to change. Any furniture or other interior décor is for informational purposes only and will not be included in the sale of any unit within Palazzo del Sol / della Luna at Fisher Island, A Condominium (Phase II) at Fisher Island, A Condominium.
